
Telehealth Geriatrician

Access Aged Care has developed a successful and innovative approach to primary care for residential aged care consumers. The Access Aged Care model has been developed to encompass a co-managed team consisting of General Practitioner, Nurse, Geriatrician (via telehealth) and Administration support to ensure optimum care for consumers. The benefits of having a co-managed team to contribute to the consumers care reduces the time spent by General Practitioners managing their schedules and focusing on the important needs of the consumer. Embracing this new and innovative model of care is imperative to ensure that we deliver excellence on every level.

Co-Managed Team Members & Equipment Provided

- Registered Nurse supporting clinicians in triage of clinical needs, following up outstanding issues, assisting with documentation and assessments.
- General Practitioner to co-manage and visit consumers face-to-face regularly.
- Conduct regular assessments including CMA, RMMR, Case Conference, Care Plan Contributions.
- Administration to support and communicate with General Practitioner, Geriatrician, Nurse and aged care home.
- Cloud base software to complete consultation notes, referrals and scripting.

Role Scope

- Acute ward rounds conducted via telehealth, with Access Aged Care Nurse facilitating at aged care homes. Nurse will liaise with Care Managers and our team to manage consumer needs.
- All consumer scripting requirements and clinical notes to be completed at time of consultation.
- Referrals – Pathology, Radiology etc to be followed up accordingly (Nurse will forward any abnormalities). Specialist referrals where appropriate.
- Ad-hoc requirements to be actioned and completed in a timely manner.
- Availability (if possible) for 'locum' consultations via telehealth outside of scheduled rounds. Provide Access Aged Care with feedback and assist in building the best possible care model for our consumers.
